

Special session proposal for IJCIEOM 2025 conference SPS10

1. Session title:

Enhancing sustainability and resilience through Circular Economy practices in the agrifood & wine industrial supply chains

2. Session objectives:

Supply chains worldwide are striving to improve their sustainability and resilience to face major challenges related to environmental impacts and resource management. In this context, the Circular Economy (CE) paradigm is gaining momentum as a way to decouple economic growth from material consumptions and environmental burdens, improving the sustainability of supply chains and enhancing resiliency paths. This special session aims at investigating the potential of CE strategies to support agrifood & wine industrial supply chains in the transition towards more sustainable and reliable models, considering their impacts on SC management. Both sector-specific case studies and more generic approaches are welcome.

3. Organizer(s):

- Fabiana Tornese, University of Salento, fabiana.tornese@unisalento.it
- Pier Paolo Miglietta, University of Salento, pierpaolo.miglietta@unisalento.it
- Antonio Padovano, University of Calabria, antonio.padovano@unical.it
- Giulio Agnusdei, Pegaso University, giulio.agnusdei@unipegaso.it
