

Special session proposal for IJCIEOM 2025 conference SPS14

1. Session title: Digital Health To Mitigating Neglected Tropical Diseases Burden

2. Session objectives:

- **Foster Innovation:** Highlight cutting-edge digital tools, such as telemedicine, artificial intelligence, mobile health (mHealth) applications, and big data analytics, that improve the detection, treatment, and management of NTDs.
- **Promote Collaboration:** Provide a platform for interdisciplinary exchange among researchers, practitioners, policymakers, and industry experts to advance digital health solutions tailored to combat NTDs.
- **Strengthen Health Systems:** Examine the role of digital health in enhancing surveillance systems, streamlining supply chains, and supporting the integration of NTD control programs into broader health initiatives.
- **Address Barriers:** Identify challenges to implementing digital health technologies in resource-limited settings, including infrastructure gaps, funding constraints, and cultural acceptability.
- **Build Evidence:** Showcase case studies, pilot projects, and research findings that demonstrate the impact of digital health interventions on reducing the NTD burden.

3. Organizer(s):

- Douglas de Souza Rodrigues, Universidade Federal Fluminense,
